Aboobaker Siddique

Electronics & Communication Engineering Graduate

Electronics and Communication Engineering graduate with experience in embedded systems, robotics, circuit design, and UI/UX. Seeking an entry-level Engineering role to apply technical skills and contribute to innovative projects while growing professionally.

Experience

Graphic Designer, Divegrid

Dec 2024 – Feb 2025

- Designed digital marketing materials and branding assets. Collaborated with cross-functional teams to deliver creative solutions.

UI Designer, Lofilute

Jan 2024 – Nov 2024

- Designed responsive user interfaces for web and mobile applications. Created wireframes, prototypes, and high-fidelity UI designs using Figma.

Sales Staff, Planet Jewel

Jul 2024 – Sep 2024

- Assisted customers and handled sales operations. Developed communication and interpersonal skills in a customer-facing environment.

Projects

Hazard Guardian and Rescue Bot

- Technologies: Embedded Systems, Sensors, Robotics
- Designed and developed a multifunctional rescue robot capable of detecting fire and hazardous gas leaks. Integrated multiple sensors to improve disaster response and emergency monitoring. Implemented emergency alert functionality for faster incident reporting.

Breathomicser

- Technologies: Embedded Systems, Gas Sensors
- Developed a non-invasive health monitoring prototype that analyzes human breath for early disease detection. Designed a portable system focused on accessibility and rapid screening. Explored sensor-based diagnostic techniques for healthcare applications.

Education

University College of Engineering, Kariavattom

Bachelor of Technology (B.Tech) – Electronics & Communication Engineering
2022 – 2026

Languages

English | Malayalam

Skills

Figma | Canva | Arduino | Python | Circuit Design | Embedded Systems
